162.1:943 Treasury Department,
Office of the Secretary,
Division of Research and Statistics.

PRICES AND YIELDS OF PUBLIC MARKETABLE SECURITIES ISSUED BY THE UNITED STATES GOVERNMENT AND BY FEDERAL AGENCIES

JANUARY 1943

All prices shown in this statement are closing bid and ask quotations in the over-the-counter market as compiled by the Federal Reserve Bank of New York. Quotations for Treasury bills are on a bank-discount basis; quotations for certificates of indebtedness, two Federal Home Loan Bank debentures, and all Federal Intermediate Credit Bank debentures are on a yield basis; quotations for all other issues are on a price basis per hundred dollars of principal amount (excluding accrued interest) with price decimals representing thirty-seconds. Quotations for securities traded on a "when issued" basis (except Federal Intermediate Credit Bank debentures) are shown beginning with the first day such trading is authorized.

Yields are computed on the mean of bid and ask, except that, when the mean results in a fraction of a thirty-second, it is raised or lowered to the nearest even thirty-second. In the case of securities for which there is no ask price, yields are based on the bid price only. Yields are computed to delivery date on the basis of either a 360-day or a 365-day year, depending upon market practice with respect to each issue, and represent nominal annual rates compounded semiannually. When the price of a bond, note, or debenture is such as to result in a negative yield, the excess of price over zero yield is given in the yield column. Zero yields are indicated 0.00 if rounded from a positive yield less than 0.005 percent, and %2 if rounded from an excess of price over zero yield less than 1.005 percent, and %3 if rounded from an excess of price over zero yield less than 0.005 percent, and %4. Whenever a negative discount is indicated in the bid and ask columns by quoting the excess of price over zero discount; in this statement, a negative discount is indicated in the bid and ask columns by quoting the excess of price over zero discount, while in the mean column it is indicated by the abbreviation neg. Average yield or discount is not shown when both positives and negatives occur within the month. Average ask

Issues maturing during the month are excluded when no quotations are available. Otherwise, days on which an outstanding issue is not quoted are indicated by the abbreviation n. q. Days on which the market is closed, or a particular issue is not outstanding, are indicated by dashes.

I. SECURITIES ISSUED BY THE UNITED STATES GOVERNMENT

												1	<u> </u>	1			iold" is n	

Issue dates are in parentheses. Debentures having identical quotations throughout the month are grouped.
 Excludes issues completely held by Farm Credit Administration agencies.

⁸ Callable on 30 days' notice at 100\footnote{2} on July 3, 1943. "Yield" is computed to maturity or to call date, depending on which gives the lower yield.
